11:40 – 12:10	Panel discussion - part 2.: Key lessons learned and future <i>(moderator asks questions and all participants answer the same questions, panellist answer after each question):</i>

	<ul style="list-style-type: none"> - In the first session we heard about different and similar challenges every country has faced and now we would like to know more about the key lessons learned and what can we do to prevent it in the future. What are the key lessons we have learned? - What are positive things we have learned and experienced that we want to hold on to? - How should the hospital and public health systems be equipped to successfully combat a pandemic? What is the role of regional/local and national level in that case? - How should the legislation be harmonized to enable more efficient operation of the civil protection system? - How to influence local and regional self-government so that the civil protection system can be functional and help in the event of major disasters and catastrophes caused by climate change and pandemics? - Finally, what would you say is the key lesson we have learned from this experience and what can we do to be more prepared for similar circumstances in the future?
12:10 - 12:30	Questions and Answers
12:30 – 12:45	Closing conference with a summary of the key conclusions
